Understanding Recycled Paper

Activity Goal

- Understanding one of China's Four Great Inventions, papermaking, through stories.
- Using environmentally friendly materials to produce recycled paper.
- Cultivating an attitude of cherishing paper

Activity Introduction

Through the story of Cai Lun and the invention of paper, young children will learn about the great Chinese tradition of papermaking and explore the methods and techniques used to make paper. To integrate the theme of environmental protection, the children will attempt to practice papermaking using old newspapers. This hands-on exploration will help them understand the process of paper formation and the intricate steps involved in making paper, fostering a good habit of cherishing paper.
