3. Inherit traditional values of filial piety and respect

Activity Introduction

The teacher used 《讀書》 as an introduction to the relevant description to the children. The two protagonists wanted their father to read to them and they had a dispute. This brought out how to respect and care for their parents. For example, they can go home and hug their parents every day, or give massages to their parents to express their gratitude for their hard-work. Children can develop feelings of love, respect and gratitude for their parents and build strong family relationships.
