A Visit to The H2O Public Education Centre

Activity Goal

1. Understand the basic processes of the water cycle system
2. Gain basic knowledge about the importance of water to living things and daily life
3. Cultivate a positive attitude toward cherishing and conserving water

Activity Introduction

Through on-site staff introductions of water resource exhibits, live demonstrations, and interactive games, children learn about the water cycle system. They can observe the flow and usage of water. The activities are rich and varied, including watching educational films, hands-on water cycle activities, and simulated fishing. These activities help children understand information related to water resources and cultivate an attitude of cherishing water.
