Food Detective Workshop

Activity Goal

1. Launch experiential learning to spark children's curiosity.
2. Guide children to use their five senses to explore food, nature, and eco-friendly connections.
3. Develop healthy eating habits that are friendly to the environment.

Activity Introduction

Through an experiential learning process, children are encouraged to activate their curiosity and are guided to use their five senses to explore food, nature, and eco-friendly practices through interactive experiences. They also get to know and handle ingredients, and make their own organic herb mini pizza and tofu cheese. Through these activities, children learn how to choose low-carbon ingredients, while also enjoying the fun and sense of accomplishment of making food themselves.
